

IR915

Brand: InHand Networks

Product Code: IR915

Availability: In Stock

Weight: 590.00g

Dimensions: 132.60mm x 112.80mm x
45.00mm

Call for Price: 1-514-697-2327

Short Description

InHand Networks

Ubiquitous cellular networks are changing everything, while we have been experiencing emerging needs on Machine-to-Machine communication. InRouter900 series is the new generation of industrial router developed by InHand Networks for M2M in 4G era.

Description

Integrating 4G LTE and various broadband WANs, providing uninterrupted access to internet, embedding full security network services, supporting tens of thousands device connections, InRouter900 enables more data applications for machines. InRouter900 has also been built for rapid deployment and easy management, which enables you to scale up M2M application combining data and video, in limited time and budget. InRouter900 is born with best-in-class reliability which ensures availability of your business, wherever harsh environment your machine stands.

InRouter900 is particularly suitable for large scale M2M solution, such as vending machine, ATM, digital signage, industrial automation equipment, smart grid, medical device, robot, field machinery, digital factory.

InRouter900 brings to machines brand new possibilities of data transaction, intelligent analysis, and advanced service
