Short Description

Raveon

*****Coming Soon*****

The RV-R55 Skyline Base Station is a fully contained wireless hub for use with Raveon's M50 series radio modems and GPS transponders.

Description

The RV-R55 Skyline Base Station is a fully contained wireless hub for use with Raveon's M50 series radio modems and GPS transponders. It uses either LoRa or DART WNA protocols to communicate with 1 to millions of Wireless Devices (WDs). R55's on the same system automatically mesh together to form as large of a network as desired.
